📁 EMPLOYMENT HISTORY

Front End Developer at Lotus Infotech, Surat

May 2011 — November 2017

- Utilized HTML, CSS, and JavaScript to create a dynamic, interactive user interface that improved user experience
- Employed AJAX and JSON technologies to create a seamless data exchange between the front-end and back-end
- Integrated third-party APIs to provide additional functionality and improve user experience
- Developed unit tests to ensure code integrity and reduce the number of bugs found in production
- Developed a custom theme for a content management system (CMS) that improved the look and feel of the website
- Utilized version control systems such as Git to manage code changes and collaborate with other developers
- Implemented a content management system (CMS) that allowed for easier maintenance and updates to the website
- Created custom graphics, logos, and illustrations that enhanced the website's aesthetic
- Implemented custom animations and transitions that improved user experience
- Integrated animation and motion graphics that improved the overall aesthetics of the website
- Developed custom scripts and plugins to extend the functionality of the website
- Optimized the website for mobile devices, ensuring a seamless cross-platform experience
- Developed a web-based data visualization tool that allowed for better decision-making by management

UI Developer at Sai Krupa Enterprise, Surat

January 2018 — February 2019

- Developed user interfaces that were cross-browser and device compatible, ensuring a consistent user experience across platforms
- Developed front-end architecture that improved scalability and performance of the website
- Utilized web analytics to identify user behavior and improve usability of the website
- Utilized version control to ensure code integrity and maintain version history
- Developed and implemented user-friendly navigation that improved user experience and decreased bounce rate by 80%
